(3) An application for a patent of addition shall be made in Form No. 3. (4) An application in terms of subsection (2) of section thirty-one for the grant of a patent of addition instead of an independent patent shall be made in Form No. 4. (5) Every application (other than a convention application) shall be accompanied by either a provisional specification in duplicate in Form No. 5 or a complete specification shall be accompanied in Form No. 6; and every convention application shall be accompanied by a complete specification in duplicate in Form No. 6.

4. An application for a patent by an assignee or the legal representative of a person who was the owner of an invention when he died shall be accompanied by the deed of assignment or the probate of the will of the deceased or the letters of administration, as the case may be, or a certified copy thereof, and such further evidence and proof of the applicant's title as the Registrar may require.

5. Where, in pursuance of subsection (3) of section thirteen, the Registrar allows a single complete specification to be proceeded with in respect of two or more applications in respect of which two or more complete specifications have been lodged, the single complete specification may include any matter disclosed in any of the said specifications and shall be deemed to have been lodged on such date, not earlier than the earliest date on which all the matter disclosed in the said single complete specification has been disclosed to the Office in or in
connection with the applications, as the Registrar may direct.

6. Where a complete specification has been lodged pursuant to two or more applications accompanied by provisional specifications for inventions which the applicant believes to be cognate or modifications one of another and the Registrar is of the opinion that such inventions are not cognate or modifications one of another, the Registrar may allow the complete specification to be divided into such number of complete specifications as may be necessary to enable the applications to be proceeded with as two or more separate applications for patents.

7. (1) In addition to the specific specification lodged with every convention application, there shall be lodged with the application, or within six months thereafter, a copy of the specification and drawings or documents lodged in respect of the relevant first application or applications for protection in a convention country, duly certified by the official chief or head of the patent office of the convention country, or otherwise verified to the satisfaction of the Registrar.

(2) If any specification or other document relating to the application is in a foreign language, it shall be accompanied by a translation thereof in the English language verified to the satisfaction of the Registrar.

8. Where a single convention application has been made in respect of all or part of the inventions in respect of which two or more applications for protection have been made in one or more convention countries, the Registrar may, if he is satisfied that the claims of the specification lodged with the said convention application relate to more than one invention, allow one or more further applications to be lodged and the specification to be divided into such number of specifications as may be necessary to enable two or more separate convention applications to be proceeded with, and may direct that the said applications be deemed to have been lodged on the date of lodging of the original application.

9. A request in terms of subsection (2) of section thirteen for an extension of time for lodging a complete specification shall be made in Form No. 7.
10. A request in terms of subsection (1) of section seventeen for the post-dating of an application shall be made in Form No. 8.

11. Drawings, when supplied, shall accompany the provisional or complete specification to which they refer, except in the case provided for by regulation 18. A true copy of the original drawings shall be lodged at the same time as the original drawings.

12. (1) Drawings shall be made on pure white tough drawing paper, not thinner than 100 sheets to the inch, of smooth surface and good quality, and without colour or washes, in such a way as to admit of being clearly reproduced on a reduced scale by photography.

(2) Mounted drawings may not be used.

13. (1) Drawings shall be on sheets which measure 13 inches from top to bottom and are either 8 inches or 16 inches wide, and shall be made on one side of the paper only and have 1 1/2 inches clear binding margin on the left-hand side of the sheet and a 1/2 inch clear margin on the top, bottom and right-hand side of the sheet.

(2) If there are more figures than can be shown on one of the smaller sized sheets, two or more of these sheets shall be used unless the large size is required by the size of any one figure.

(3) An exceptionally large figure may be continued on subsequent sheets.

(4) No more sheets shall be employed than are necessary.
(5) The figures shall be numbered consecutively without regard to the number of sheets, and shall as far as possible be arranged in numerical order, separated by a sufficient space to keep them distinct.

(6) Where figures on a number of sheets form in effect a single complete figure, they shall be so arranged that the complete figure can be assembled without concealing any part of another figure.

14. Drawings shall be prepared in accordance with the following requirements:

(a) they shall be executed in durable black or very dark markings;
(b) each line shall be firmly and evenly drawn, sharply defined, and of the same strength throughout;
(c) section lines, lines for effect, and shading lines shall be as few as possible, and shall not be closely drawn;
(d) shading lines shall not contrast excessively in thickness with the general lines of the drawing;
(e) sections and shading shall not be represented by solid black or washes;
(f) they shall be on a scale sufficiently large to show the invention clearly, and only so much of the apparatus, machine or article may appear as effects this purpose;
(g) if the scale is given, it shall be drawn and not denoted by words, and no dimensions may be marked on the drawings;
(h) where convenient, the figures shall be drawn in an upright position in regard to the top and bottom of the sheet;
(i) subject to any special directions of the Registrar in any particular case, reference letters and numerals and index letters and numerals used in conjunction therewith shall be bold, distinct and not less than 1/8 inch in height; the same letters or numerals shall be used in different views of the same parts; and where the reference letters or numerals are shown outside the parts referred to, they shall be connected with the said parts by fine lines.

15. (1) Drawings shall bear-

(a) in the left-hand top corner the name of the applicant and, in the
case of drawings lodged with a complete specification after one or more provisional specifications, the numbers and years of the applications;

(b) in the right-hand top corner the number of sheets of drawings sent and the consecutive number of each sheet, and the words "original" or "true copy", as the case may require;

(c) in the right-hand bottom corner the signature of the applicant or his agent.

(2) The title of the invention shall not appear on the drawings.

16. (1) No descriptive matter shall appear on constructional drawings, but drawings in the nature of flow sheets may bear descriptive matter to show the materials used and the chemical or other reactions or treatments effected in carrying out the invention.

(2) Drawings showing a number of instruments or units of apparatus and their interconnections, either mechanical or electrical, where each such instrument or unit is shown only symbolically, may bear such descriptive matter as is necessary to identify the instruments or units or their interconnections.

(3) Such descriptive matter shall be in black or very dark markings on both the original and the true copy drawings and on the latter the letters shall be not less than 1/4 inch in height.

(4) No drawing or sketch, other than a graphic chemical formula or a mathematical formula, symbol or equation, shall appear in the verbal part of the specification and if such a formula, symbol or equation is used therein a copy thereof, prepared in the same manner as original drawings, except that it may be a hand-made drawing on tracing-cloth, shall be furnished if the Registrar so directs.

17. Drawings shall be delivered at the Office free from folds, breaks or creases which would render them unsuitable for reproduction by photography.

18. If an applicant desires to adopt the drawings lodged with his
provisional specification as the drawings or part of the drawings for his complete specification, he shall refer to them in the complete specification as those lodged with the provisional specification.

PART IV
